SAP-DDIC

Code: SAP-VA-01

Duration: 22 hrs

Objectives:

1. To build an understanding of the fundamental concepts of ERP systems, their architecture, and working of different modules in ERP.
2. To understand the concepts of DDIC and how to use them in Workbench tools to develop their own business applications.
3. To enhance the Standard SAP Software to meet specific customer requirements.
4. To understand the key concepts in the Data Dictionary to integrate it into SAP ABAP to implement the various applications.

Outcome: Able to implement ERP for an organization with custom needs.

Unit:-1

SAP Systems: Key capabilities of SAP NetWeaver, Architecture of SAP system, AS ABAP, AS JAVA,

SAP Portfolio: Components of SAP Application portfolio,
Navigation Basics, User Interfaces

System Core: AS ABAP (Architecture, Process), AS JAVA (Architecture, Process), Dual Stack,
Communication & Integration Technologies: RFC, BAPI.

Unit:-2

Introduction to ABAP Dictionary,

Data Types: Creating domains and data elements, Flat Structures, Nested Structure and Deep Structure, Table Types, Type Groups.

Database Tables: Transparent Table, Pool Table, Cluster Table.

Unit:-3

Performance during Table Access: Database table Indexes (Primary Indexes, Secondary Indexes), Table Buffering, Input Checks, Text Tables, Active and Inactive dictionary objects, Dependencies with ABAP Dictionary.

Unit:-4

Table Changes/Table Conversion, Append Structures,

Views: Database View, Projection View, Maintenance View, Help View, View Cluster,

Search Help: Elementary Search Help, Collective Search Help.

Course Outcomes:

- i) Learn various Sap systems portfolios and their components.
- ii) Able to understand ABAP data types, terminology, and dictionary concepts, including structures, tables.
- iii) Able to Learn buffers, indexes, Text Tables, input checks, Dependencies with ABAP Dictionary etc.
- iv) Understand the concepts of views, search help, Table Conversion.
