DEPARTMENT GENERAL SURGERY
M.M. Institute of Medical Science & Research
Mullana (Ambala)

Date –13/6/2015

A laparoscopic suturing technique class was conducted on 13th June 2015 at MM Institute of Medical Sciences and Research, Mullana, Ambala which was attended by 20 post graduate students in the department of general surgery of MMIMSR, It was conducted by Dr. Sankalp Dwivedi, Dr Gaurav Gupta, Dr Anand Thawait and Dr. Nitish Dhawan, Department of General Surgery.

In this course, participants were taught about the **Laparoscopic suturing techniques.** An introduction of the endo-trainer along with its working was given. **The different types of knots were initially explained like Surgeon's Knot, Square knot, Tumble Square knot, Roeder's Knot, Tayside Knot and Melzer's knot.** They were briefed about the ergonomics of suturing, and types of suturing – Intra corporeal suturing, Extra corporeal suturing. They were taught about the different instruments i.e- needle holders, knot pushers and suture materials used for laparoscopic suturing. They were also explained about the various concepts and principles of the techniques. They were given hands on training.

Report of Workshop of BLS & ACLS

A BLS & ACLS course was conducted on 16- 18 October 2015 at Central Research Lab of MM Institute of Medical Sciences and Research, Mullana Ambala which was attended by 30 Post graduate students of different departments of MMIMSR, Mullana . It was conducted by Dr. Manisha Bhatt Dwivedi, Dr. J R Thakur, Dr. Dhanwant Kaur, Dr. Sapna Bansal , Dr. Jasbir Kaur, Dr. Babita Ramdev and Dr. Anisha Puri.

In this course the participants were taught about **Basic Life Support & Advanced Cardiac Life Support.** They were briefed about adult & pediatric prehospital care, chain of survival and AED with Video presentation. A hands on training was given for chest compression and mask Ventilation. The participants were taught the various ECG rhythms and about advanced Cardiac Life Support. They were given hands on training about Defibrillators and advanced airway techniques on various mannequins. They were taught about team dynamics through video presentations and various case scenarios.

DEPARTMENT OF ENT AND HEAD NECK SURGERY

Date: 05/10/2017

Report of Course on Temporal Bone Dissection

A course on Temporal Bone Dissection was conducted from 10th September 2017 to 5th October 2017 at Temporal Bone Dissection lab, MMIMSR, MMDU, Mullana, Ambala. It was attended by 6 Post Graduate students of department of ENT and Head Neck Surgery. It was conducted by Dr. Nitish Baisakhiya, Dr. L.N. Garg, Dr. Manish Gupta and Dr. Ginni Datta.

The department has a well-equipped temporal bone dissection lab with six working stations. Temporal bone dissection is part of teaching plan and is organized in the department from time to time.

Students were oriented to basic anatomy of skull and temporal bone in particular. Emphasis was laid on handling of operating microscope and surgical instruments.

Demonstration by live dissection was followed by hands on dissection by students. Procedures such as Cortical Mastoidectomy, Posterior Tympanotomy, Modified Radical Mastoidectomy and Facial Nerve Decompression were performed by the students.

Thus the students gained hands-on practice and confidence before operating on live patients.

Report of Course on Temporal Bone Dissection

A course on Temporal Bone Dissection was conducted from 11th March 2018 to 15th April 2018 at Temporal Bone Dissection lab, MMIMSR, MMDU, Mullana, Ambala. It was attended by 6 Post Graduate students of department of ENT and Head Neck Surgery. It was conducted by Dr. Nitish Baisakhiya, Dr. L.N. Garg, Dr. Manish Gupta and Dr. Ginni Datta.

The department has a well-equipped temporal bone dissection lab with six working stations. Temporal bone dissection is part of teaching plan and is organized in the department from time to time.

Students were oriented to basic anatomy of skull and temporal bone in particular. Emphasis was laid on handling of operating microscope and surgical instruments.

Demonstration by live dissection was followed by hands on dissection by students. Procedures such as Cortical Mastoidectomy, Posterior Tympanotomy, Modified Radical Mastoidectomy and Facial Nerve Decompression were performed by the students.

Thus the students gained hands-on practice and confidence before operating on live patients.

A training program on **ADVANCED TRAUMA LIFE SUPPORT (ATLS)** was conducted in MM Institute of Medical Sciences and Research, Mullana, Ambala on 15th September 2018, which was attended by 40 under graduate students in the Skill lab of MMIMSR, It was conducted by Dr. Anand Thawait, Professor, Department of General Surgery, Dr. Nitish Dhawan, Assistant Professor, Department of General Surgery, Dr Prabhjyot Singh, Senior Resident, Department of General Surgery.

In this course, participants were taught about the concepts and principles of primary and secondary patient assessments i.e. airway maintenance with restriction of cervical spine motion, breathing and ventilation, circulation with hemorrhage control, disability(assessment of neurologic status) and exposure/environmental control with head to toe evaluation of trauma patients. The key principle was that the potential for missing an injury or failing to appreciate the significance of an injury is great, especially in an unresponsive or unstable patient.

Discussion was also done on management priorities in trauma situations and airway and ventilatory management skills were taught with hands on training. Simulation of emergency management in various types of thoracic, abdominal, pelvic and head trauma were practiced and discussed. Principles of initiation of primary and secondary management necessary for emergency acute life threatening conditions in a timely manner were explained.

DEPARTMENT OF ENT AND HEAD NECK SURGERY

Date: 14/10/2018

Report of Course on Temporal Bone Dissection

A course on Temporal Bone Dissection was conducted from 16th September 2018 to 14th October 2018 at Temporal Bone Dissection lab, MMIMSR, MMDU, Mullana, Ambala.

It was attended by 5 Post Graduate students of department of ENT and Head Neck Surgery. It was conducted by Dr. Manish Gupta, Dr. L.N. Garg, Dr. Namit, Dr. Ginni Datta and Dr. Gurchand Singh.

The department has a well-equipped temporal bone dissection lab with six working stations. Temporal bone dissection is part of teaching plan and is organized in the department from time to time.

Students were oriented to basic anatomy of skull and temporal bone in particular. Emphasis was laid on handling of operating microscope and surgical instruments.

Demonstration by live dissection was followed by hands on dissection by students. Procedures such as Cortical Mastoidectomy, Posterior Tympanotomy, Modified Radical Mastoidectomy and Facial Nerve Decompression were performed by the students.

Thus the students gained hands-on practice and confidence before operating on live patients.
