To Whom It May Concern

This is to confirm that **Dr. Moumita Kotal** (Passport. No. H9676168) was a Visiting Scientist in my group (ACTIVE Laboratory) during the period of 18<sup>th</sup> June 2018 to 26<sup>th</sup> July, 2018 at **Korea Advanced Institute of Science and Technology (KAIST)**, South Korea. She is currently working as Assistant Professor in **Maharishi Markandeshwar Deemed to be University, India**. I wish to congratulate her for recent publication in *Advanced Functional Materials* (*Impact Factor=13.44*) which is *selected as hot article*. During her short-period of staying as Visiting Scientist in my research group at KAIST, she was fully focused on our current collaborative research work. In particular, I have conducted several times of research meetings with Dr. Kotal regarding the progress of our current research work. Her recent work is based on the *development of novel hybrid electrodes towards the exploration of ionic-actuators*. Her work is going in fruitful direction.

I am very much impressed by her efficient work with novel ideas. Her knowledge in basic and applied chemistry & material engineering is well up to the mark. Overall she is highly dedicated in her study and research.

Summarily, I am very confident that Dr. Kotal will definitely contribute very much to any Institution / laboratory. I wish her all the best in his life.

Sincerely Yours,

To Whom It May Concern

This is to confirm that **Dr. Sandipan Roy** (Passport. No. L2048270) was a Visiting Scientist in my group (ACTIVE Laboratory) during the period of 18<sup>th</sup> June 2018 to 26<sup>th</sup> July, 2018 at **Korea Advanced Institute of Science and Technology (KAIST)**, South Korea. He is currently working as Assistant Professor in **Maharishi Markandeshwar Deemed to be University, India**. During his short period of staying as Visiting Scientist in my research group at KAIST, he was fully focused on manuscript preparation based on our collaborative work. In particular, I have conducted several times of research meetings with Dr. Roy regarding the progress of our current work and related to some other discussions for making future research work. Actually, *our current manuscript is based on the exploration of porous organic template derived novel electrode materials as high-performance ionic actuators which will be submitted very soon.* During his staying, he also started another work based on the newly designed porous electrolyte membrane for soft ionic artificial muscle.

I am very much impressed by his hard work with innovative ideas. His knowledge in basic and applied chemistry & material engineering is well up to the mark. Overall he is highly dedicated in his study and research.

Summarily, I am very confident that Dr. Roy will definitely contribute very much to any Institution / laboratory. I wish him all the best in his life.

Sincerely Yours,
