Dear Jyoti

Good to talk with you again and we are very grateful that you will continue the collaboration with VID Specialized University.

We are translating the new curriculum for nursing and I will send it to you as soon as it arrives and then we could have a meeting on Teams to discuss how to collaborate. I had hoped to see if we could have 3-6 months exchange for master students as well.

In the meantime:

### Group 1

We are hoping to send 4 students to India for 18 weeks from the 1<sup>st</sup> January 2022 (these are following the new curriculum which I will send you soon).

### Their programme could be as follows:

2 weeks introduction to medical or surgical nursing

8 weeks clinical practice in medical or surgical nursing

8 weeks Public health ( on-line course from Norway and 2-3 weeks clinical practice with you)

I suppose there is no problem of getting student visa for these students since they will be part of you programme.

## Group 2

The other group are following the old curriculum and are 3<sup>rd</sup> year students. They are about 25 students who are going to have some theory before their 7 weeks clinical practice in different hospitals and old age homes in South India.

## Programme

### 2<sup>nd</sup> - 6th January 2022

1 week theory - how to write a bach. thesis (I do that, but could do it in English) (its usually 2 weeks, but we have long days and choose to compromise to 1 week)

### 7<sup>th</sup> – 10<sup>th</sup> January 2022

1 week theory – introduction to clinical practice in project management (its usually 2 weeks, but we have long days and choose to compromise l to 1 week). Lasse is in charge of this part of the programme, but would one of your tutors be able to come to Pondicherry and participate in giving classes for the students?

We have a budget of NOK 20.000 which we would pay you for this.

After two weeks theory they have:

7 weeks clinical practice in project management (and four of them Diaconia practice in PONDY). The rest have 2 weeks which they have to stay in India to start working on their bach. thesis which goes over 8 weeks.

As the situation is in India at the present do all the students need student visa for 3 months. If you participate in the theory part in PONDY and are payed for it, could they then be accepted as your students and apply for student visa for 3 months?

Hoping for a positive answer.

Regards Benedicte

### Workshops and Trainings

At Merck, we believe in training the next generation scientists and making them ready for academic and industrial world. Through year-round workshops and training we help newbies and experienced research professional in understanding the basics of science, learning specific skill sets and getting insights into the functioning of biotechnology industry. Below mentioned are some of our foundation programs to help student explore the world of research and beyond-

### Workshop series on fundamental and advanced techniques

When young college graduates are introduced to the world of science either in academia or industry, there are multiple aspects of scientific research that are new to them. A lot of their valuable time is spent in finding answers to key fundamentals questions like- how to define research problems, how to plan experiments and how to record, analyse and handle their data. In addition, a significant amount of their time is invested in standardizing basic molecular biology techniques.

The workshop series on fundamental and advanced techniques is targeted to address these concern points of young researchers. Through a series of lectures, discussions and case studies, a panel of industry

and academia experts will help students in developing skills to overcome these challenges. This will be coupled with a detailed and intensive hands-on workshop on basic methods in molecular biology. Students will also use new and advanced methods and tricks that would be very useful in improving their scientific effectiveness.

### Target Audience:

This course is designed for researchers in their early career (B.Tech/M.Tech/M.Sc) who would like to get trained in basic scientific practices and molecular biology techniques useful for exploring career in biotech/life science industries or academia. No previous experience scientific experience or training in molecular biology is required or expected.

### Workshop Series Modules:

During this course you will learn:

- Research design- defining questions, designing experiments, data analysis and data handling
- Basics of cell culture and good practices
- DNA techniques- DNA isolation, basics of PCR, gel electrophoresis,
- RNA techniques- RNA isolation, electrophoresis and quality control
- Expression analysis- by RT-PCR, cDNA synthesis, data analysis
- Protein techniques- protein isolation, Western Blotting by SNAP-ID
- CRISPR based genome editing
- Plant genetic engineering
- Recombinant DNA technology

### Learning Objectives:

- After this course you should be able to:
- Identify, define and dissect research problems; design experiments using proper controls and sample size
- Maintain lab data records using basic and advanced tools

- Analyse data with proper use of statistics
- Culture cells in your laboratory using best practices
- Design primers, isolate, quantify and analyse DNA
- Perform PCR, program PCR machines,
- Isolate, quantify and analyse RNA
